

hifrog - To do #10434

Automatically detect the bound in HiFrog for the sake of completeness

29/03/2019 14:52 - Sepideh Asadi

Status:	New	Start date:	29/03/2019
Priority:	Normal	Due date:	
Assignee:	Sepideh Asadi	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Developing a preprocessing mechanism to detect the necessary depth of unrolling the program.(completeness threshold) Then we can claim on verification of those instances, not just falsification.
